

January 27, 1930.

Mrs. Annie C. Hansen,
Boulder, Utah.

Dear Madam:

RE: BOULDER CREEK DIST.

I have your letter of January 22 and am sorry to learn of the trouble you are having as to your water. I note your request to have somebody from this office make a field examination in the spring.

It would seem to me that the only proper way to handle this situation would be by the appointment of a water commissioner for Boulder Creek. I question very much any good results coming from a single visit of anyone from this office as it is my experience that in situations of this kind everybody agrees to follow out any instructions given and as soon as the deputy leaves everyone goes on as formerly.

It might help some if you would let me have the names and addresses of the individuals who have been actually engaged in interfering with your diversion. It often happens in the outlying districts that the water users are not familiar with the water law and it is the exception when I find anyone willing to go directly against the law after being actually advised of what it involves.

Yours very truly,

State Engineer.
